November 2012

For November 2012, net remittances were **US\$136.0 million**, which represented an improvement of **US\$3.3 million** or **2.5 per cent** relative to the corresponding period of 2011 (Table 1). This resulted from a marginal increase in gross remittance inflows and a decline in remittance outflows.

During the month, total remittance inflows were **US\$157.8 million**, an improvement of **US\$2.7 million** or **1.7 per cent**. The growth in total remittance inflows emanated primarily from an increase of **US\$7.1 million** in **Remittance Companies** inflows (Table 1). Additionally, a decrease of **US\$0.6 million** in outflows contributed to the increase in net remittances.

For the review month, remittance inflows of **US\$157.8 million** were above the average of **US\$149.5 million** for the previous five corresponding periods (Graph 1). This improvement, relative to the corresponding period of 2011, was primarily due to an increase in inflows through **Remittance Companies** (Table 1).

January to November 2012

For the first eleven months of 2012, net remittances were **US\$1 597.9 million**, which represented an increase of **US\$13.2 million** or **0.8 per cent** relative to the corresponding period of 2011 (Table 2). This resulted from an increase in gross inflows, which was partially offset by an increase in remittance outflows.

For the review period, total remittance inflows was **US\$1 840.9 million**, representing an increase of **US\$18.1 million** or **1.0 per cent**. The increase in total remittance inflows emanated from improvements in inflows to *Remittance Companies*. However, this was partially offset by a reduction in the *Other Remittances* sub-category. *Remittance Companies* recorded an increase of **US\$34.2 million** or **2.2 per cent**, while *Other Remittances* recorded a reduction of **US\$16.1 million** or **5.9 per cent** compared to the corresponding period in 2011. For the review period, the positive growth in net remittances inflows was partially offset by an increase of **US\$4.9 million** in outflows.

Although marginally better than the corresponding period in 2011, remittance inflows of **US\$1 840.9 million** was still below the pre-crisis (2008) outturn (Graph 2). A continued improvement in remittance inflows in ensuing months is predicated on the basis of an improvement of the macroeconomic conditions in source economies.

Historical Trend in Remittance Inflows
Apr-Nov 2003/04-2012/13

Source: Bank of Jamaica

April to November 2012/13

For the first eight months of the 2012/13 fiscal year (FY), net remittances was **US\$1 161.3 million**, which represented a decline of **US\$2.1 million** or **0.2 per cent** relative to the corresponding period of the previous fiscal year. This resulted from a reduction in gross remittance inflows which were partially offset by a reduction in remittance outflows.

For the FY to November, total remittance inflows were **US\$1 336.1 million**, representing a decline of **US\$7.0 million** or **0.5 per cent** over the corresponding period of the preceding fiscal year. The reduction in total remittance inflows emanated from a decline in the *Other Remittances* sub-category. *Remittance Companies* recorded an increase of **US\$11.2 million** or **1.0 per cent** while *Other Remittances* declined by **US\$18.2 million** or **9.0 per cent**. For the review period, the contraction in remittance inflows was partially offset by reductions of **US\$ 4.9 million** in outflows.

The remittance inflows of **US\$1 336.1 million** for the first eight months of the 2012/13 fiscal year represent a deterioration over the value which was recorded for the corresponding period of fiscal year 2011/12 (Graph 3).

Although marginally below the corresponding period in 2011/12, remittance inflows of **US\$1 336.1 million** were still above the average for the previous five corresponding periods (Graph 3).
