### **February 2009**

For February 2009, there was a current account deficit of **US\$36.1 million**, which represented an improvement of **US\$136.2 million** relative to the corresponding period of 2008. The improvement in the current account resulted from the performance of all sub-accounts except current transfers (Table 1).

During the month, the goods balance recorded a deficit of **US\$199.4 million**, an improvement of **US\$122.3 million**. This resulted from a reduction in imports of **US\$250.5 million**, which was significantly influenced by a reduction in **Mineral Fuel** imports of **US\$158.0 million** (Graph 1). The improvement in the goods sub-account was partially offset by a **US\$128.2 million** decline in exports, stemming mainly from a reduction in alumina exports of **US\$76.5 million**.

**Graph 1**  
**Change in Value of Imports**  
**February 2009**

In relation to the services balance, there was an increase of **US\$8.7 million** its surplus position. This increase resulted primarily from a decline in freight cost, associated with reduced imports. The income sub-account balance improved by **US\$22.6 million** during the month. This improvement resulted from a reduction in profits remitted by foreign direct investment companies. Over the review period, current transfers declined by **US\$17.4 million** to **US\$150.3 million**. The decline resulted primarily from a reduction of **US\$18.9 million** in net private transfers.

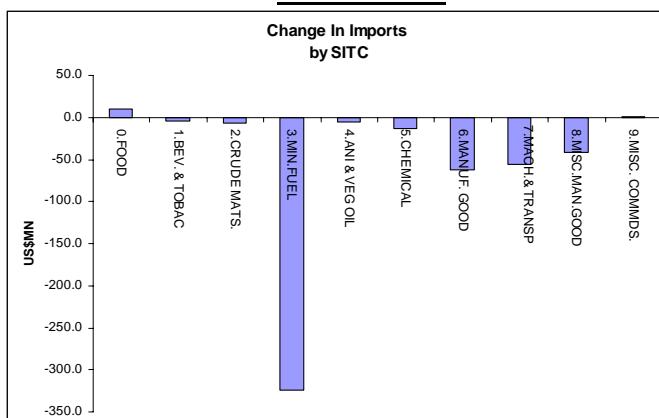

Flows from official and private sources were insufficient to finance the current account deficit. Consequently, the NIR declined by **US\$163.1 million** during the month.

### January to February 2009

For the first two months of 2009, there was a current account deficit of **US\$193.0 million**, which represented an improvement of **US\$294.4 million** relative to the corresponding period in 2008. The improved performance in the current account emanated from improvements in all sub-accounts except current transfers (Table 2).

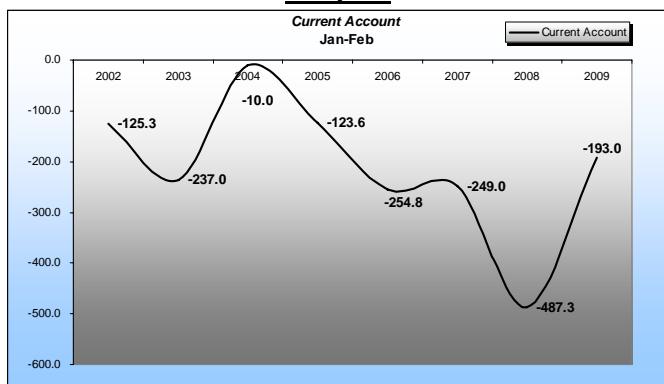

During the period, the goods balance recorded a deficit of **US\$512.4 million**, an improvement of **US\$272.6 million** when compared to the corresponding period in 2008. This resulted primarily from a reduction in imports of **US\$481.2 million**, which was significantly influenced by a reduction in **Mineral Fuel** of **US\$324.3 million** (Graph 2). The improvement observed in the goods sub-account was partially offset by a **US\$208.7 million** decline in exports, stemming mainly from a reduction in alumina exports of **US\$133.4 million**.

The surplus on the services balance sub-account increased by **US\$17.6 million**. This resulted primarily from a decline in freight cost associated with reduced imports.

The income sub-account balance improved by **US\$30.2 million** during the review period. This improvement resulted from a reduction in profits remitted by foreign direct investment companies.

Over the review period, current transfers declined by **US\$26.0 million** to **US\$294.9 million**. The deterioration in the current transfers sub-account resulted primarily from a decline in net private transfers of **US\$26.8 million**.

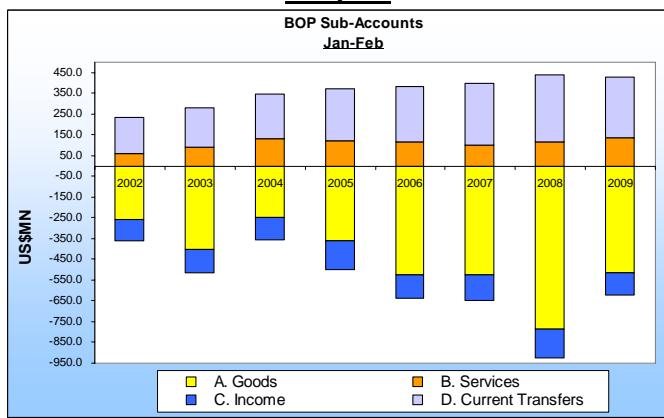

**Graph 3**

Flows from official and private sources were insufficient to finance the current account deficit. Consequently, there was a decline in the NIR of **US\$171.1 million** during the period.

For January to February 2009 the current account deficit of **US\$193.0 million** represents a reversal of the trend observed in recent history (Graph 3). This improvement resulted primarily from a reduction in the deficit in the goods sub-account (Graph 4).

#### April to February 2008/09

For April to February 2008/09, there was a current account deficit of **US\$2,903.8 million**, which represented a deterioration of **US\$693.9 million** relative to the preceding fiscal year. The deterioration emanated primarily from the goods sub-account (Table 3).

For the goods sub-account, there was a deficit of **US\$4,471.8 million**, which represented a deterioration of **US\$645.8 million** relative to the corresponding period of the previous fiscal year. This performance resulted from an increase of **US\$529.3 million** in imports. The increase in imports was driven primarily by **Mineral Fuel**, which increased by **US\$275.1 million** (Graph 5).

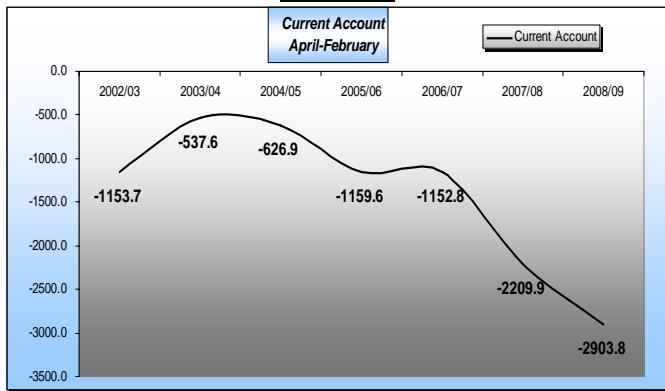

The balance on the services sub-account declined by **US\$78.0 million** during the review period. This primarily resulted from increased freight cost, associated with increased imports. The decrease in net income outflow during the period emanated primarily from reductions in profit remitted by foreign direct investment companies.

During the review period, current transfers declined by **US\$32.5 million** to **US\$1,857.4 million**. The deterioration in the current transfers sub-account resulted from a **US\$26.4 million** decline in official transfers.

Source: STATIN

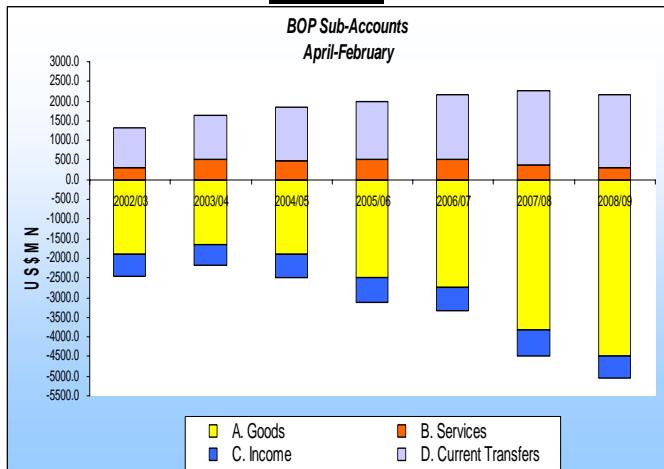

### Graph 6

Flows from official and private sources were insufficient to finance the current account deficit. Consequently, the NIR declined by **US\$481.5 million** during the review period.

The current account deficit of **US\$2,903.8 million** for April to February 2008/09 is the largest on record for the country for that period (Graph 6). From graph 7, it can be seen that the deterioration in the current account results primarily from the performance of the goods sub-account.
