### July 2011

For July 2011, there was a current account deficit of **US\$124.8 million**, which represented a deterioration of **US\$56.8 million** relative to July 2010. The deterioration in the current account resulted primarily from deteriorations in the goods and income sub-accounts (Table I).

During the month, the goods balance recorded a deficit of **US\$346.8 million**, a deterioration of **US\$63.4 million**. This resulted from a **US\$82.1 million** increase in imports, which was marginally offset by a **US\$18.7 million** increase in exports. The increase in imports was significantly influenced by a **US\$102.2 million** increase in mineral fuel imports (Graph 1), while the increase in exports was due primarily to an increase of **US\$18.8 million** in alumina exports.

In relation to the services balance, there was an decrease of **US\$9.7 million** in its surplus position. The income sub-account balance deteriorated by **US\$2.7 million** during the month. This resulted primarily from an increase in foreign direct investments outflows. Over the review period, current transfers increased by **US\$19.0 million** to **US\$183.9 million**. The improvement resulted primarily from an increase in net private transfers of **US\$15.1 million**.

Flows from official and private sources were insufficient to finance the current account deficit. Consequently, the NIR declined by **US\$110.7 million**.

### **Jan-July 2011**

For the first seven months of 2011, there was a current account deficit of **US\$943.3 million**, which represented a deterioration of **US\$613.7 million** relative to the corresponding period in 2010. The deterioration in the current account resulted primarily from the goods sub-account (Table II).

During the period, the goods balance recorded a deficit of **US\$2,307.6 million**, a deterioration of **US\$525.9 million** when compared to the corresponding period in 2010. This resulted primarily from an increase in imports of **US\$728.5 million**, which was significantly influenced by an increase in mineral fuel imports of **US\$562.8 million** (Graph 2). The deterioration in the goods sub-account was partially offset by a **US\$202.7 million** increase in exports, stemming mainly from an increase in alumina exports of **US\$142.4 million**.

In relation to the services balance, there was a decline of **US\$32.9 million** in its surplus position. This resulted from an increase in estimated freight cost associated with imports. The income sub-account deteriorated by **US\$105.4 million** during the review period. This deterioration primarily emanated from an increase in both official interest payments on external debt and profits remitted by foreign direct investment companies of **US\$16.7 million** and **US\$77.3 million** respectively.

During the review period, current transfers increased by **US\$50.5 million** to **US\$1,194.3 million**. The improvement resulted primarily from an increase in net private transfers of **US\$63.6 million**.

**Graph 3**

Flows from official and private sources were insufficient to finance the current account deficit. Consequently, the NIR declined by **US\$15.0 million** during the period.

For January to July 2011, the current account deficit of **US\$943.3 million** represented a deterioration relative to the corresponding period in 2010 (Graph 3). This resulted from deteriorations in all sub-accounts except the current transfers sub-account (Graph 4).

### April to July 2011/12

For the first four months of 2011/12 fiscal year, there was a current account deficit of **US\$611.7 million**, representing a deterioration of **US\$314.5 million** relative to corresponding period in the preceding fiscal year. The deterioration in the current account emanated primarily from the goods and income sub-accounts (Table III).

For the goods sub-account, there was a deficit of **US\$1,333.1 million**, a deterioration of **US\$245.1 million** relative to the corresponding period of the previous fiscal year. This resulted from an increase of **US\$400.9 million** in imports. The deterioration in the goods sub-account was partially offset by a **US\$155.8 million** increase in exports. The increase in imports was driven by increases in most import categories, particularly increases in imports of mineral fuel and chemicals **US\$344.1 million** and **US\$63.0 million**, respectively (Graph 5). The increase in exports resulted primarily from an increase in alumina exports of **US\$101.9 million**.

There was a decline in the surplus balance on the services sub-account of **US\$15.8 million** during the review period. This resulted primarily from an increase in freight cost. The income sub-account deteriorated by **US\$74.9 million** during the review period. This reduction primarily emanated from an increase in profits remitted by foreign direct investment companies of **US\$53.1 million**.

Relative to the corresponding period of 2010/11, current transfers increased by **US\$21.3 million** to **US\$696.2 million**. This increase resulted from increases in net private transfers.

**Graph 6**

Flows from official and private sources were insufficient to finance the current account deficit. Consequently, the NIR declined by **US\$396.8 million** during the review period.

The current account deficit of **US\$611.7 million** for the first four months of 2011/12 fiscal year represented a deterioration when compared to the corresponding period in the preceding fiscal year (Graph 6). This higher deficit was primarily driven by deteriorations in the goods and income sub-accounts (Graph 7).

## *Glossary*

### **Balance of Payments**

The balance of payments (BOP) is a summary of economic activities between the residents of a country and the rest of the world during a given period, usually one year. The main purpose of keeping these records is to inform government authorities of the overall international economic position of the country in order to assist them in arriving at decisions on monetary and fiscal policy, on the one hand, and trade and payments policy on the other. BOP statistics are therefore helpful to government authorities charged with maintaining macroeconomic stability.

The BOP is divided into two main categories according to the broad nature of the transactions. These categories are:

1. *The Current Account, and*
2. *The Capital and Financial Account*

#### **1. Current Account**

The current account includes all transactions (excluding those recorded in the capital and financial account) between resident and non-resident entities that involve economic value. This account is sub-divided into:

- a. *Goods and Services*
- b. *Income, and*
- c. *Current transfers*

a. The **Goods** and **Services** account covers merchandise trade, travel, transportation and other services.

i. **Merchandise trade** records the value of exports and imports, of tangible goods, including those of the freezones and goods procured in ports by international carriers.

ii. **Travel** covers goods and services acquired from an economy by non-resident travellers for business and personal purposes during their visits (of less than one year). Expenditures made by seasonal workers (e.g. Jamaican farm workers) and those for educational and health-related purposes made by students and medical patients are recorded in this sub-account.

- iii. **Transportation** covers all transportation services (sea, air and land), bought and sold, that involve the carriage of passengers, movement of goods (freight), charter of carriers with crew and other supporting services.
  - iv. **Other Services** consist of the purchase and sale of: communication services, construction services, insurance services, financial services, computer and information services, royalties and licences fees and government services.
- b. **Income** encompasses the compensation of employees, that is, salaries, wages and benefits of seasonal and other non-resident workers. In addition, it includes investment income that consists of dividends, profits, reinvested earnings, interest on debt and income on portfolio investment.
- c. **Current transfers** cover transactions such as taxes on income, workers' remittances, and premiums and claims on non-life insurance.

## **2. Capital and Financial Account**

The **capital** and **financial** account records transactions that directly affect the wealth and debt of the country. The account is sub-divided into two main categories:

a. *The Capital Account, and*

b. *The Financial Account*

a. The Capital Account covers (i) capital transfers and (ii) the acquisition/disposal of non-produced, non-financial assets.

(i) **Capital transfers** include the transfer of ownership of fixed assets, the transfer of funds linked to disposal/acquisition of fixed assets and the cancellation of debt by creditors. Acquisition/disposal of non-produced, non-financial assets mainly involves intangibles such as patents and leases. It also includes purchases and sales of land by foreign embassies.

b. The Financial account covers (i) direct investment, (ii) portfolio investment, (iii) other investments (trade credits, loans, currencies and deposits) and (iv) changes in reserves.

(i) **Direct investment** is the category of international investment in which a resident entity in one economy acquires or disposes of 10 per cent or more of the

ordinary shares or voting power of an enterprise located in another economy and has an effective voice in management.

(ii) **Portfolio Investment** covers transactions in equity securities and debt securities. With respect to equity, a portfolio investment would imply less than 10 per cent ownership of the voting power of an enterprise located in another country. Debt securities include bonds and notes, money market instruments and financial derivatives.

(iii) **Other investment** is a residual category that includes all financial transactions not covered in direct investment, portfolio investment or reserve assets. It includes trade credits, (the direct extension of credit by suppliers to buyers of goods and services), loans to finance trade, other loans and advances and financial leases.

(iv) **The Reserves** represent the foreign exchange which the country has available for financing an imbalance of payments with the rest of the world.
