### October 2008

For October 2008, there was a current account deficit of **US\$333.8 million**, which represented a deterioration of **US\$20.1 million** relative to the corresponding period of 2007. The deterioration emanated primarily from the goods sub-account (Table 1).

During the month, the goods balance recorded a deficit of **US\$431.1 million**, a deterioration of **US\$26.1 million** when compared to the corresponding period in 2007. This resulted from an increase in imports of **US\$27.2 million**, which was significantly influenced by increases in *Food* and *Manufactured Goods* imports of **US\$28.2 million** and **US\$20.9 million**, respectively (Graph 1).

A reduction in profit remitted by direct investment was the primary factor contributing to the reduction in net income outflows of **US\$9.4 million**.

Flows from official and private sources were insufficient to finance the current account deficit. Consequently, there was a decline in the NIR of **US\$448.5 million** during the month.

### January to October 2008

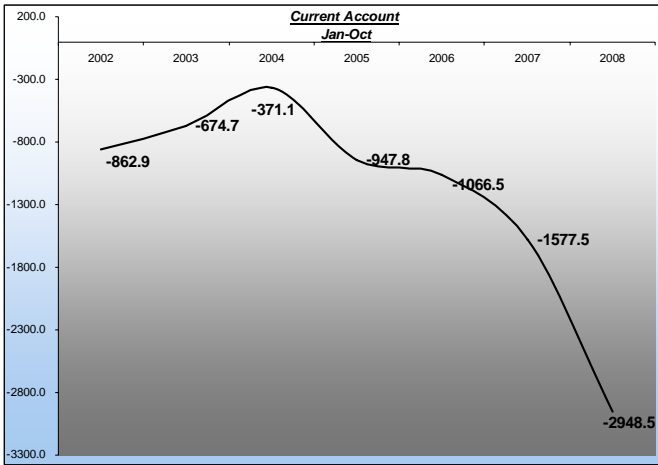

For the first ten months of the 2008 calendar year, there was a current account deficit of **US\$2,948.5 million**, which represented a deterioration of **US\$1,371.0 million** relative to the corresponding period in 2007. This resulted from deteriorations in all sub-accounts except current transfers (Table 2).

For the goods sub-account, there was a deficit of **US\$4,413.0 million**, which represented a deterioration of **US\$1,361.7 million** relative to the corresponding period of the previous year. This performance resulted from an increase of **US\$1,883.4 million** in imports, which was partially offset by an increase in exports of **US\$521.7 million**. The increase in imports was driven primarily by *Mineral Fuel*, which increased by **US\$1,319.4 million** (Graph 2). The increase in exports was driven primarily by an increase of **US\$195.8 million** in *Chemicals*.

In relation to the services balance, there was a decline in its surplus by **US\$92.7 million**, which primarily resulted from an increased freight cost, associated with increased imports.

Over the review period, current transfers increased by **US\$89.0 million** to **US\$1,758.0 million**. The improved performance in the current transfers sub-account resulted primarily from a **US\$113.0 million (7.1 per cent)** increase in remittances.

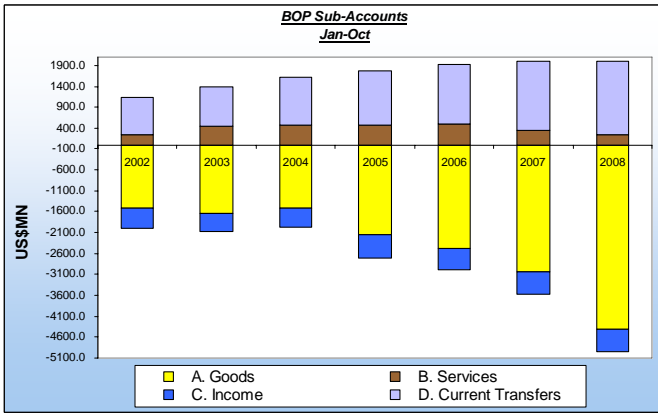

**Graph 3**

Flows from official and private sources were insufficient to finance the current account deficit. Consequently, the NIR declined by **US\$75.1 million** during the review period.

In relation to the historical performance of the BOP, for the period January to October 2008, the current account deficit of **US\$2,948.5 million** is the largest on record for the country for that period (Graph 3). From graph 4, it can be seen that the deterioration in the current account results primarily from the performance of the goods sub-account.

**April to October 2008/09**

For the first seven months of the fiscal year 2008/09, there was a current account deficit of **US\$2,293.9 million**, which represented a deterioration of **US\$1,032.1 million** relative to the preceding fiscal year. The deterioration emanated primarily from the goods sub-account (Table 3).

For the goods sub-account, there was a deficit of **US\$3,258.9 million**, which represented a deterioration of **US\$1,008.2 million** relative to the corresponding period of the previous fiscal year. This performance resulted from an increase of **US\$1,382.3 million** in imports, which was partially offset by an increase in exports of **US\$374.1 million**. The increase in imports was driven primarily by *Mineral Fuel*, which increased by **US\$919.2 million** (Graph 5). The increase in exports was driven primarily by increases of **US\$136.6 million** and **US\$79.0 million** in *Chemicals* and *Alumina*, respectively.

In relation to the services balance, there was a decline in its surplus by **US\$124.6 million**, which primarily resulted from increased freight cost, associated with increased imports. The decrease in net income outflow during the period emanated primarily from reductions in profit remitted by foreign direct investment companies.

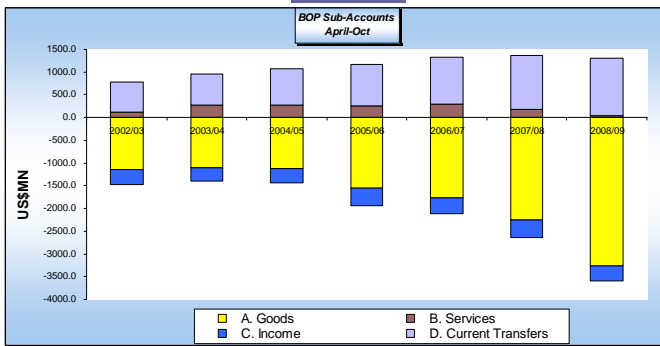

**Graph 6**

During the review period, current transfers increased by **US\$58.1 million** to **US\$1,256.1 million**. The improved performance in the current transfers sub-account resulted from a **US\$70.7 million (6.1 per cent)** increase in remittance inflows.

Flows from official and private sources were not sufficient to finance the current account deficit. Consequently, the NIR declined by **US\$280.7 million** during the review period.

**Graph 7**

In relation to the historical performance of the BOP, the current account deficit of **US\$2,293.9 million** for April to October 2008/09 is the largest on record for the country for that period (Graph 6). From graph 7, it can be seen that the deterioration in the current account results primarily from the performance of the goods sub-account.
