### October 2009

For October 2009, there was a current account deficit of **US\$140.8 million**, which represented an improvement of **US\$159.8 million** relative to the corresponding period in 2008. The improved performance in the current account emanated primarily from the goods sub-account (Table 1).

During the month, the goods balance recorded a deficit of **US\$269.7 million**, an improvement of **US\$150.7 million**. This resulted from a reduction in imports of **US\$227.0 million**, which was significantly influenced by a **US\$138.3 million** reduction in *Mineral Fuel* imports (Graph 1). The improvement in imports was partially offset by a **US\$76.4 million** decline in exports, stemming mainly from a reduction in alumina exports of **US\$65.6 million**.

In relation to the services balance, there was an increase of **US\$23.5 million** in its surplus position. This primarily resulted from reduced freight costs associated with the contraction in imports. The income sub-account balance declined by **US\$10.6 million** during the month. This deterioration resulted from a reduction in the compensation of employees. Over the review period, current transfers decreased by **US\$3.8 million** to **US\$174.0 million**. This reduction resulted primarily from a decline of **US\$3.8 million** in net private transfers.

Flows from official and private sources were insufficient to finance the current account deficit. Consequently, the NIR declined by **US\$23.9 million** during the month.

### January to October 2009

For the first ten months of 2009, there was a current account deficit of **US\$655.4 million**, which represented an improvement of **US\$1,954.3 million** relative to the corresponding period in 2008. The improvement in the current account resulted primarily from the performance of the goods sub-account (Table 2).

During the period, the goods balance recorded a deficit of **US\$2,495.0 million**, an improvement of **US\$1,789.1 million** when compared to the corresponding period in 2008. This resulted primarily from a reduction in imports of **US\$3,065.9 million**, which was significantly influenced by a reduction in *Mineral Fuel* of **US\$2,048.2 million** (Graph 2). The improvement observed in the goods sub-account was partially offset by a **US\$1,276.7 million** decline in exports, stemming mainly from a reduction in alumina exports of **US\$763.6 million**.

The surplus on the services sub-account increased by **US\$313.5 million**. This primarily resulted from a decline in freight costs associated with reduced imports.

The income sub-account balance deteriorated by **US\$30.9 million** during the review period. The deterioration emanated primarily from the decline in the compensation of employees.

Over the review period, current transfers declined by **US\$117.5 million** to **US\$1,693.8 million**. The deterioration in the current transfers sub-account resulted primarily from a decline in net private transfers of **US\$165.6 million**.

**Graph 3**

Flows from official and private sources were sufficient to finance the current account deficit. Consequently, the NIR increased by **US\$136.4 million** during the period.

For January to October 2009, the current account deficit of **US\$655.4 million** represents a reversal of the trend-deterioration observed in recent history (Graph 3). This improvement resulted primarily from a reduction in the deficit in the goods sub-account (Graph 4).

### April to October 2009/10

For the first seven months of the 2009/10 fiscal year, there was a current account deficit of **US\$499.4 million**, an improvement of **US\$1,598.1 million** relative to the preceding fiscal year. The improvement in the current account emanated primarily from the goods sub-account (Table 3).

For the goods sub-account, there was a deficit of **US\$1,745.8 million**, an improvement of **US\$1,465.9 million** relative to the corresponding period of the previous fiscal year. This resulted from a reduction of **US\$2,312.9 million** in imports, which was partially offset by a decline of **US\$847.0 million** in exports. The decline in imports was driven primarily by a **US\$1,500.4 million** in *Mineral Fuel* (Graph 5), while the decline in exports resulted primarily from a reduction in alumina exports of **US\$572.3 million**.

The surplus on the services sub-account increased by **US\$270.6 million** during the review period. This was due largely to reduced freight costs associated with lower levels of imports. The increase in net income outflow during the period emanated primarily from higher interest payments on official external debt.

During the review period, current transfers declined by **US\$74.5 million** to **US\$1,219.8 million**. The deterioration in the current transfers sub-account resulted primarily from a **US\$117.1 million** decline in net private transfers.

**Graph 6**

Flows from official and private sources were sufficient to finance the current account deficit. Consequently, the NIR increased by **US\$280.8 million** during the review period.

The current account deficit of **US\$499.4 million** for the first seven months of the 2009/10 fiscal year represents the lowest in recent history (Graph 6). This resulted primarily from the performance of the goods sub-account (Graph 7).

## Glossary

### **Balance of Payments**

The balance of payments (BOP) is a summary of economic activities between the residents of a country and the rest of the world during a given period, usually one year. The main purpose of keeping these records is to inform government authorities of the overall international economic position of the country in order to assist them in arriving at decisions on monetary and fiscal policy, on the one hand, and trade and payments policy on the other. BOP statistics are therefore helpful to government authorities charged with maintaining macroeconomic stability.

The BOP is divided into two main categories according to the broad nature of the transactions. These categories are:

1. *The Current Account, and*
2. *The Capital and Financial Account*

#### **1. Current Account**

The current account includes all transactions (excluding those recorded in the capital and financial account) between resident and non-resident entities that involve economic value. This account is sub-divided into:

- a. *Goods and Services*
- b. *Income, and*
- c. *Current transfers*

a. The **Goods** and **Services** account covers merchandise trade, travel, transportation and other services.

i. **Merchandise trade** records the value of exports and imports, of tangible goods, including those of the freezones and goods procured in ports by international carriers.

ii. **Travel** covers goods and services acquired from an economy by non-resident travellers for business and personal purposes during their visits (of less than one

year). Expenditures made by seasonal workers (e.g. Jamaican farm workers) and those for educational and health-related purposes made by students and medical patients are recorded in this sub-account.

iii. **Transportation** covers all transportation services (sea, air and land), bought and sold, that involve the carriage of passengers, movement of goods (freight), charter of carriers with crew and other supporting services.

iv. **Other Services** consist of the purchase and sale of: communication services, construction services, insurance services, financial services, computer and information services, royalties and licences fees and government services.

b. **Income** encompasses the compensation of employees, that is, salaries, wages and benefits of seasonal and other non-resident workers. In addition, it includes investment income that consists of dividends, profits, reinvested earnings, interest on debt and income on portfolio investment.

c. **Current transfers** cover transactions such as taxes on income, workers' remittances, and premiums and claims on non-life insurance.

## **2. Capital and Financial Account**

The **capital** and **financial** account records transactions that directly affect the wealth and debt of the country. The account is sub-divided into two main categories:

a. *The Capital Account, and*

b. *The Financial Account*

a. The Capital Account covers (i) capital transfers and (ii) the acquisition/disposal of non-produced, non-financial assets.

(i) **Capital transfers** include the transfer of ownership of fixed assets, the transfer of funds linked to disposal/acquisition of fixed assets and the cancellation of debt by creditors. Acquisition/disposal of non-produced, non-financial assets mainly involves intangibles such as patents and leases. It also includes purchases and sales of land by foreign embassies.

b. The Financial account covers (i) direct investment, (ii) portfolio investment, (iii) other investments (trade credits, loans, currencies and deposits) and (iv) changes in reserves.

(i) **Direct investment** is the category of international investment in which a resident entity in one economy acquires or disposes of 10 per cent or more of the ordinary shares or voting power of an enterprise located in another economy and has an effective voice in management.

(ii) **Portfolio Investment** covers transactions in equity securities and debt securities. With respect to equity, a portfolio investment would imply less than 10 per cent ownership of the voting power of an enterprise located in another country. Debt securities include bonds and notes, money market instruments and financial derivatives.

(iii) **Other investment** is a residual category that includes all financial transactions not covered in direct investment, portfolio investment or reserve assets. It includes trade credits, (the direct extension of credit by suppliers to buyers of goods and services), loans to finance trade, other loans and advances and financial leases.

(iv) **The Reserves** represent the foreign exchange which the country has available for financing an imbalance of payments with the rest of the world.
