September 2008

For September 2008, there was a current account deficit of **US\$254.1 million**, which represented a deterioration of **US\$6.3 million** relative to the corresponding period of 2007. The deterioration in the current account emanated from all the sub-accounts except current transfers (Table 1).

During the month, the goods balance recorded a deficit of **US\$370.7 million**, a deterioration of **US\$5.4 million** when compared to the corresponding period in 2007. This resulted from an increase in imports of **US\$111.0 million**, which was significantly influenced by the increase in *Mineral Fuel* imports of **US\$58.1 million** (Graph 1). The increase in imports was partially offset by an increase in exports of **US\$105.6 million**. This occurred in the context of an increase in alumina exports of **US\$48.1 million**.

Increases in transportation and insurance costs, associated with the increase in imports, were the primary factors contributing to the reduction in the services balance by **US\$9.9 million**.

Flows from official and private sources were insufficient to finance the current account deficit. Consequently, there was a contraction in the NIR of **US\$36.8 million** during the month.

January to September 2008

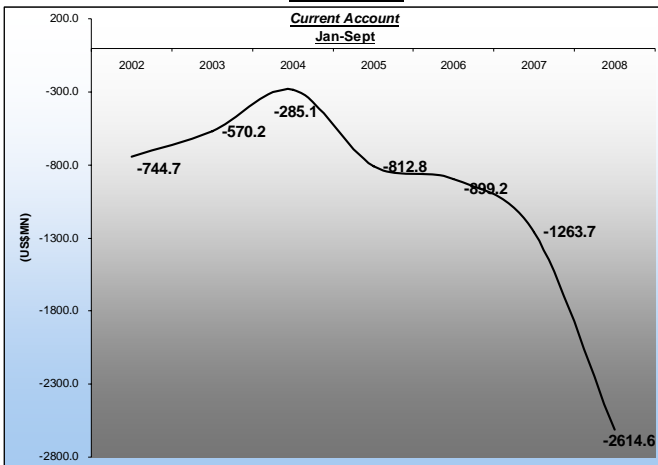

For the first nine months of the 2008 calendar year, there was a current account deficit of **US\$2,614.6 million**, which represented a deterioration of **US\$1,350.9 million** relative to the corresponding period in 2007. This resulted from deteriorations in all sub-accounts except current transfers (Table 2).

For the goods sub-account, there was a deficit of **US\$3,982.0 million**, which represented a deterioration of **US\$1,335.6 million** relative to the corresponding period of the previous year. This performance resulted from an increase of **US\$1,856.1 million** in imports, which were partially offset by an increase in exports of **US\$520.5 million**. The increase in imports was driven primarily by *Mineral Fuel*, which increased by **US\$1,317.8 million** (Graph 2). The increase in exports was driven primarily by increases of **US\$196.6 million** and **US\$103.9 million** in *Chemicals* and *Crude Materials*, respectively.

In relation to the services balance, there was a decline in its surplus by **US\$90.9 million**, which primarily resulted from increased freight cost, associated with increased imports.

During the review period, current transfers increased by **US\$90.6 million** to **US\$1,586.8 million**. This improved performance resulted primarily from a **US\$116.8 million (8.2 per cent)** increase in remittances.

Graph 3

Flows from official and private sources were more than sufficient to finance the current account deficit. Consequently, the NIR increased by **US\$373.4 million** during the review period.

In relation to the historical performance of the BOP, for the period January to September 2008, the current account deficit of **US\$2,614.6 million** is the largest on record for the country for that period (Graph 3). From graph 4, it can be seen that the deterioration in the current account results primarily from the performance of the goods sub-account.

April to September 2008/09

For the first six months of the fiscal year 2008/09, there was a current account deficit of **US\$1,959.8 million**, which represented a deterioration of **US\$1,011.8 million** relative to the preceding fiscal year. The deterioration emanated primarily from the goods services sub-account, but was partially offset by improvements in the current transfers and income sub-accounts (Table 3).

For the goods sub-account, there was a deficit of **US\$2,827.8 million**, which represented a deterioration of **US\$982.0 million** relative to the corresponding period of the previous fiscal year. This performance resulted from an increase of **US\$1,355.0 million** in imports, which were partially offset by an increase in exports of **US\$373.0 million**. The increase in imports was driven primarily by *Mineral Fuel*, which increased by **US\$917.5 million** (Graph 5). The increase in exports was driven primarily by increases of **US\$137.3 million** and **US\$112.7 million** in *Chemicals* and *Crude Materials*, respectively.

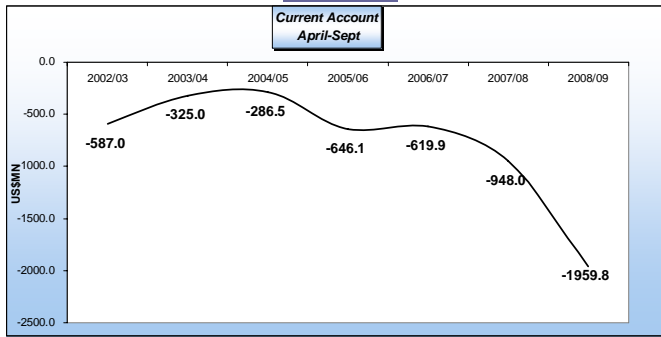

Graph 5

In relation to the services balance, there was a decline in its surplus by **US\$122.7 million**, which primarily resulted from increased freight cost, associated with increased imports. The increase in net income during the period emanated primarily from a decline in net income outflows, emanating from reductions in profit remitted by foreign direct investment companies.

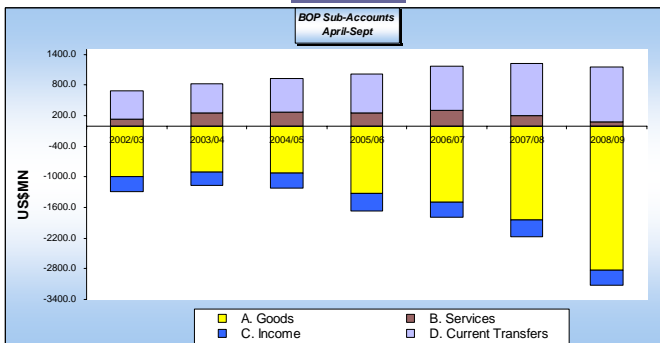

Graph 6

Over the review period, current transfers increased by **US\$59.7 million** to **US\$1,084.9 million**. The improved performance in the current transfers sub-account resulted from a **US\$74.4 million (7.6 per cent)** increase in remittance inflows.

Flows from official and private sources were more than sufficient to finance the current account deficit. Consequently, the NIR increased by **US\$167.8 million** during the review period.

Graph 7

In relation to the historical performance of the BOP, the current account deficit of **US\$1,959.8 million** for April to August 2008/09 is the largest on record for the country for that period (Graph 6). From graph 7, it can be seen that the deterioration in the current account results primarily from the performance of the goods sub-account.
