*** Indicative Rates*

INFLATION

AUGUST 2006

The All Jamaica Consumer Price Index (CPI) increased by 0.3 per cent in August 2006, relative to 1.4 per cent in the previous month (Table 1). The outturn for the review month resulted in an inflation rate of 4.6 per cent for the fiscal year to August relative to 7.4 per cent recorded over the corresponding period in FY 2005/06. The annual point-to-point inflation rate was 8.4 per cent, 8.3 percentage points below the rate recorded in 2005. Similarly, the mean annual inflation rate of 11.7 per cent was 2.8 percentage points below the rate recorded one year ago.

The major factors influencing inflation in August were supply constraints with regard to beef and fish, the rising cost of energy, higher prices of some intermediate inputs and holiday demand. Since the start of the year, the first two of these factors have been significant in their impact on inflation. Uncharacteristically for August, falling prices for agricultural products was a moderating influence on inflation.

With the exception of *Housing & Other Housing Expenses*, all sub-categories of the CPI reflected increases relative to the previous month. The main inflationary impulses were registered in *Food & Drink*, *Healthcare & Personal Expenses* and *Transportation*. These three groups all increased by 0.5 per cent. The *Housing & Other Housing Expenses* sub-category decreased by 0.6 per cent.

The movement in the *Food & Drink* sub-index was due primarily to respective increases of 1.1 per cent and 2.0 per cent in *Meat, Poultry & Fish* and *Baked Products, Cereals & Breakfast Drinks*. The rise in the *Meat, Poultry & Fish* index was influenced by the continuing disjuncture between demand and supply of beef and the effects of the Jamaica Broilers' redirecting of its supply of fish to the North American market. Higher grains prices affected the price of flour and consequently led to increases in the prices of bread and baked products. The prices of the items in these groups were also affected by the increased cost of energy. Favourable weather conditions for the year to date have had a positive impact on agriculture supply conditions, which has facilitated respective declines in *Starchy Foods* and *Vegetables & Fruits* of 0.1 per cent and 2.1 per cent. This provided some tempering of the inflation in the *Food & Drink* group.

The 0.5 per cent increase in *Healthcare & Personal Expenses* was principally attributable to movements in the *Personal Expenses* component of the group. *Personal Expenses* were mainly affected by increases in the cost of hair care for both men and women. This was related to sharp adjustments in electricity rates driven by higher fuel cost, tariffs and the annual adjustment for inflation. Within the *Healthcare* component, there were increases in opticians' and dentists' fees as well as in the cost of some medicaments.

Another development of note within the CPI was a 0.5 per cent expansion in *Transportation*. The expansion in this sub-category mainly emanated from increases in air fares, and the price of petrol and lubricating oil. Despite the generally adverse impact of oil prices on the basket, there was countervailing impetus from a decline in fuel charges by the Jamaica Public Service Company. This resulted in lower electricity bills and a decline in *Housing & Other Housing Expenses*. A mild appreciation in the billing exchange rate also supported the fall in utility rates.

While there was negligible movement in the CPI in the Rural Areas and the KMA, the index of Other Towns expanded by 1.1 per cent. This pattern of inflation across the regions primarily reflected disparities in *Food & Drink*, which emanated mainly from the agricultural sub-groups. Sharper increases in the agricultural commodities reflected catching up by the Other Towns as these prices were coming from significantly lower levels than in other regions.

The trimmed mean index was estimated to have increased by 0.22 per cent in August, 0.11 percentage point below the previous month's measure (Table 4). This brought the 12-month point-to-point core inflation rate to 3.7 per cent, relative to the 6.0 per cent recorded for the comparable period in the previous year. Similarly, the annual average core inflation rate of 4.9 per cent was 0.5 percentage point below what obtained in the similar period of 2005. The 12-month point-to-point and annual average core inflation rates for August were the lowest since January 2003 and September 2003, respectively.

The measure of underlying inflation that excludes agricultural prices (CPI-A) was 0.52 per cent in August, compared to 0.69 per cent in the previous month. For the calendar year-to-date (CYTD), non-agricultural inflation was 5.43 per cent, relative to 6.16 per cent for CYTD 2005. The CPI-A measure of inflation for this period reflects generally slowing underlying impulses and was influenced primarily by lower oil price and exchange rate impulses relative to last year.

**JAMAICA:
BALANCE OF PAYMENTS DEVELOPMENTS
APRIL 2006**

April 2006

Provisional data suggest that the current account deficit improved significantly by US\$59.2 million in April 2006 to a deficit of US\$12.9 million (see **Table**). **This improvement stemmed primarily from an increase in the surplus on the travel account. The travel account benefited from respective increases of 31.6 per cent and 10.6 per cent in stopover and cruise passenger arrivals.** Declines in the deficits on the income and trade accounts also contributed to the narrowing of the current account deficit. The lower deficit on the income account was associated with a reduction in the imputed profit remittance of direct investment companies. Within the trade account, a fall of US\$18.4 million in imports was associated with contractions in manufactured goods and food imports. Receipts from exports fell in the month, reflecting lower earnings from alumina and sugar. The fall in alumina exports earnings reflected a 39.0 per cent reduction in export volumes and occurred in the context of industrial action in the sector.

Within the capital and financial accounts, net private investment inflows were more than sufficient to finance the public sector's net amortization of external debt, as well as the deficits on the capital and current accounts. As a result, the NIR of the Bank of Jamaica increased by US\$73.7 million for the month.

January – April 2006

The current account deficit was estimated at US\$233.5 million for January – April 2006, which was US\$7.3 million lower than the deficit in 2005. This improvement was largely attributed to significant increases in the surpluses on the services and current transfers account, complemented by a reduction in the deficit on the income account. There was, however, an increase in the merchandise trade deficit.

The higher surplus on the services account was attributed to growth of 15.7 per cent and 8.8 per cent in stopover and cruise passenger arrivals over the period, relative to the same period in 2006, while the transfers account benefited from an increase of 1.7 per cent in gross private remittance inflows. The contraction in net investment income outflows was associated with lower profit remittances of the direct investment companies. With respect to the trade account, there was an expansion in payments for fuel import reflecting the impact of a 29.5 per cent increase in oil price on the international market for the review period. In addition, the purchase of a power barge in February contributed significantly to growth in imports of machinery and transportation equipment.

Within the capital and financial accounts, net private investment inflows were more than sufficient to finance the deficits on the current and capital accounts. In this context, there was a build-up of US\$64.5 million in the NIR over the period. At end April 2006, the gross reserves stood at US\$2 440.8 million, representing 18.3 weeks of projected imports of goods and services.
