**JAMAICA:
BALANCE OF PAYMENTS DEVELOPMENTS
APRIL 2009**

April 2009

For April 2009, there was a current account deficit of US\$64.0 million, which represented improvement of US\$97.3 million relative to the corresponding period of 2008. The improvement in the current account resulted primarily from the performance of the goods sub-account.

During the month, the goods balance recorded a deficit of US\$263.4 million, an improvement of US\$74.4 million. This resulted from a reduction in imports of US\$250.7 million, which was significantly influenced by a reduction in *Mineral Fuel* imports of US\$116.0 million. The improvement in the goods sub-account was partially offset by a US\$176.3 million decline in exports, stemming mainly from a reduction in alumina exports of US\$106.8 million.

In relation to the services balance, there was an increase of US\$28.6 million in its surplus position. This primarily resulted from reduced freight costs associated with the reduction in imports. The income sub-account balance improved by US\$21.2 million during the month. This improvement resulted from a reduction in profits remitted by foreign direct investment companies. Over the review period, current transfers declined by US\$27.0 million to US\$155.6 million. This decline resulted primarily from a reduction of US\$25.2 million in net private transfers.

Flows from official and private sources were more than sufficient to finance the current account deficit. Consequently, the NIR increased by US\$35.0 million during the month.

January - April 2009

For the first four months of 2009, there was a current account deficit of US\$288.2 million, which represented an improvement of US\$577.4 million relative to the corresponding period in 2008. The improved performance in the current account emanated from improvements in all subaccounts except the current transfers sub-account.

During the period, the goods balance recorded a deficit of US\$1,011.8 million, an improvement of US\$533.5 million when compared to the corresponding period in 2008.

This resulted primarily from a reduction in imports of US\$1,017.8 million, which was significantly influenced by a reduction in *Mineral Fuel* of US\$667.5 million. The improvement observed in the goods sub-account was partially offset by a US\$484.2 million decline in exports, stemming mainly from a reduction in alumina exports of US\$298.5 million.

The surplus on the services sub-account increased by US\$50.4 million. This primarily resulted from a decline in freight costs associated with reduced imports. The income sub-account balance improved by US\$67.2 million during the review period. This resulted from a reduction in profits remitted by foreign direct investment companies.

Over the review period, current transfers declined by US\$73.7 million to US\$608.9 million. The deterioration in the current transfers sub-account resulted primarily from a decline in net private transfers of US\$74.8 million.

Flows from official and private sources were insufficient to finance the current account deficit. Consequently, there was a decline in the NIR of US\$109.4 million during the period. For January to April 2009, the current account deficit of US\$288.2 million represents a reversal of the trend deterioration observed in recent history. This improvement resulted primarily from a reduction in the deficit in the goods sub-account.
