**JAMAICA:
BALANCE OF PAYMENTS DEVELOPMENTS
JANUARY 2009**

January 2009

Provisional data indicate that the current account deficit narrowed by US\$186.7 million in January 2009, relative to the deficit in January 2008 (see Table). This improvement largely stemmed from a US\$166.3 million (58.8 per cent) decline in spending on fuel imports, consistent with a 54.9 per cent decrease in the price of oil on the international market for the month. The impact of the fall in imports was partly offset by declines of US\$57.0 million (57.0 per cent) and US\$23.0 million (42.9 per cent) in earnings from alumina and non-traditional exports, respectively.

There were also improvements in the services, income and net current transfers sub-accounts. Within the services sub-account, there was a decline in net transportation payments, associated with the lower level of imports. In addition, there was an increase in the surplus on the travel sub-account, reflecting higher estimated earnings from tourism. With respect to the income account, the decline in the deficit was largely attributed to lower profit remittances of the direct investment companies. The increase in net transfers reflected a US\$13.2 million expansion in gross official inflows which was partly offset by a decline in remittances.

Within the capital and financial account, net official and private capital inflows were insufficient to offset the current account deficit. As a result, the NIR of the Bank of Jamaica declined by US\$8.0 million for the month.
