**JAMAICA:
BALANCE OF PAYMENTS DEVELOPMENTS
APRIL 2008**

April 2008

Provisional data indicate that the current account deficit widened by US\$83.5 million in April 2008, compared with the deficit in April 2007 (see Table). This deterioration was largely associated with increased spending on imports during the month, reflecting growth of US\$71.0 million (47.6 per cent), US\$31.1 million (47.6 per cent) and US\$24.5 million (27.7 per cent) in the values of fuel, chemicals and machinery & transport equipment, respectively. The higher spending on fuel-related imports was associated with significant increases in the price of oil on the international market. The growth in imports was partly offset by a 32.4 per cent increase in earnings from merchandise exports, primarily reflecting expansions of US\$31.4 million (32.4 per cent) and US\$13.6 million (59.8 per cent) in the values of alumina and fuel exports, respectively.

For the review month, there was also a reduction in the surplus on the services sub-account, mainly attributed to higher net transportation payments, associated with the growth in imports.

Net current transfers, which grew by US\$19.0 million for the month, provided the main offsetting influence to the deterioration on the other sub-accounts. The growth in net current transfers was associated with respective increases of 11.5 per cent and 24.6 per cent in remittance inflows through remittance companies and commercial banks.

Within the capital and financial account, net official and private inflows were more than sufficient to finance the deficits on the current and capital accounts. As a result, the NIR of the Bank of Jamaica increased by US\$79.5 million for the month.

January – April 2008

The estimated current account deficit of US\$770.2 million for the period January – April 2008 was US\$392.8 million worse than the deficit for the comparable period in 2007. A deterioration in the merchandise trade deficit was the main source of the widening, stemming from significant increases of US\$382.6 million (68.8 per cent), US\$64.5 million (25.8 per cent) and US\$46.2 million (22.6 per cent) in the values of mineral fuels, chemicals and food imports, respectively. The impact of the expansion in imports was partly offset by increased earnings from major traditional exports, particularly alumina, as well as non-traditional exports.

For the review period, there was also a deterioration on the services account driven by increased transportation costs associated with the growth in imports. Partly offsetting this decline was an improvement on the travel sub-account, which reflected an expansion of 10.1 per cent in total stopover visitor arrivals.

An increase in the deficit on the income account during the period primarily emanated from a decline in investment income inflows as well as increased interest payments by the government.

Higher net current transfers in the review period partly offset the impact of the deterioration in the other sub-accounts. This reflected growth of 58.3 per cent in gross remittance inflows.

Within the capital and financial account, net private inflows were more than sufficient to finance the current account deficit as well as net official investment outflows. In this context, there was an increase of US\$285.2 million in the NIR during the review period. At end-April 2008, the gross reserves of the Bank of Jamaica stood at US\$2 185.4 million.
