	TABLE 5: Inflation Decomposition	6

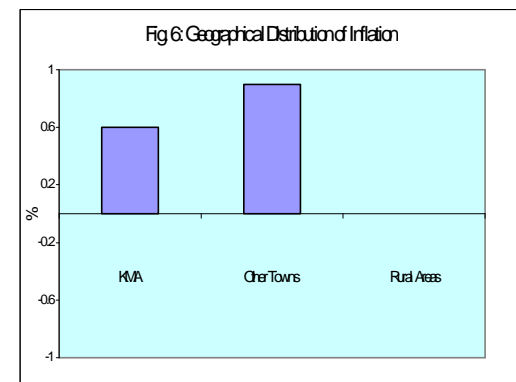

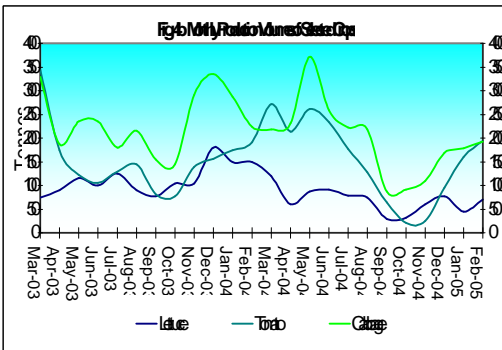

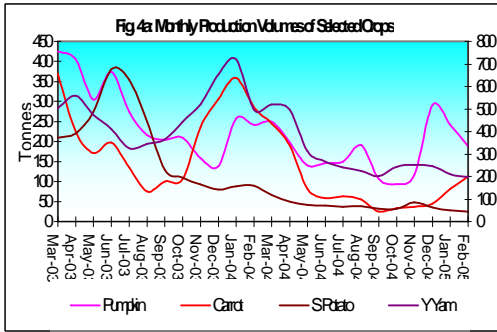

Introduction

1.0 The All Jamaica Consumer Price Index (CPI) increased by 0.4 per cent in February 2005, relative to an unchanged position in the previous month. This outturn brought inflation for the fiscal year (FY) 2004/05 to February to 12.1 per cent, which compares favourably with the 16.2 per cent obtained over the same interval in FY2003/04. The point-to-point inflation rate at February 2005 was 12.7 per cent, relative to 16.7 per cent recorded for the comparable period in the previous year. The mean annual inflation rate was 13.1 per cent, 0.3 of a percentage point lower than the rate obtained in the previous month, but higher than the 12.0 per cent recorded as at February 2004 (Table 1).

2.0 The major influences on the inflation outturn for February emanated from increases in some administered prices and, to a lesser extent, increases in petroleum prices. Given the mild appreciation in the Jamaica Dollar vis-à-vis the US dollar for December 2004 and January 2005, foreign currency movements provided some countervailing effect to inflation for the month. In this context, there were positive inflationary impulses primarily from the *Housing & Other Housing Expenses*, *Healthcare & Personal Expenses* and *Transportation* groups with partially offsetting movements in the *Food & Drink* and *Fuels & Other Household Supplies* groups. The respective increases in the *Housing & Other Housing Expenses*, *Healthcare & Personal Expenses*, and *Transportation* sub-indices were 6.1 per cent, 0.9 per cent and 0.7 per cent. Providing countervailing impulses to these increases were respective declines of 1.0 per cent and 0.3 per cent in the *Fuels & Other Household Supplies* and *Food & Drink* sub-indices (Table 2A).

Main Developments in the Basket

3.0 The increase in the sub-index for *Housing & Other Housing Expenses* was largely influenced by a 20.0 per cent increase in the minimum wage. There were also increases in artisan fees. In particular, there was a 26.9 per cent increase in mason fees and a 14.4 per cent increase in carpenter fees (see Table 4).

4.0 For Healthcare & Personal Expenses, upward adjustments in hospital charges and doctors' fees were the main factors. The increase in hospital charges was primarily related to a 200.0 per cent increase in registration fees (see Table 4). The increase of 0.7 per cent in the *Transportation* sub-index primarily reflected increases in petroleum prices, which reflected the adverse movements in international oil prices. These movements occurred in a context where international oil prices have been at their highest level since October 2004, averaging approximately US\$47.97 per barrel in February 2005.

5.0 Countervailing impulses to February's inflation outturn was reflected in Fuels & Other Household Supplies, which decreased by 1.0 per cent. This reduction emanated mainly from a 40.0 per cent decline in the price of ice. This reflected a partial reversal of the significant increase, which occurred as a result of Hurricane Ivan. Other countervailing price impulses of note occurred in *Food & Drink*, which declined by 0.3 per cent. The main sub-groups influencing this downward movement were *Vegetables & Fruits* and *Starchy Foods*, which declined by 5.3 per cent and 2.2 per cent, respectively (see Table 4). The declines experienced in the prices of agricultural produce resulted from a significant improvement in supplies. The production of tomato, lettuce and cabbage, for example, improved by 34 tonnes, 33 tonnes and 14 tonnes, respectively (see Figure 4b), relative to the previous month.

6.0 There was a notable disparity in inflation across the regions. The CPI in the Other Towns and KMA increased by 0.9 per cent and 0.6 per cent, respectively, while the index was relatively unchanged in the Rural Areas. This pattern was largely reflected in *Food & Drink* and *Fuels & Other Housing Expenses*. The disparity in *Food & Drink* primarily reflected larger declines in agricultural prices, primarily for starchy foods, in the rural areas. In particular, there was a 4.8 per cent reduction in starchy foods prices in the Rural Areas, compared to a decline of 1.0 per cent in the Other Towns and an increase of 3.3 per cent in the KMA (see Table 3). Other disparity of note occurred in *Fuels & Other Household Supplies*. There were increases of 3.1 per cent, and 0.3 per cent in the Other Towns and Rural Areas, respectively, while the KMA recorded a decline of 4.3 per cent. The sharper movement in Rural Areas primarily reflected a 5.8 per cent increase in kerosene prices relative to 0.2 per cent in the Other Towns and no change in the KMA (see Table 4). The decline registered in the KMA largely reflected a 40.0 per cent decline in the price of ice.

Core Inflation

Trimmed Mean

7.0 The trimmed mean index was estimated to have increased by 0.28 per cent in February, 0.08 percentage point below the change in the previous month (Table 5). This represents continued normalization in core inflation to be consistent with a long-run expectation in the range of 4.0 per cent to 5.0 per cent per annum. The 12-month point-to-point core inflation at February 2005 was 5.0 per cent, relative to the 8.2 per cent recorded for the similar period of 2004. The annual average core inflation rate of 6.0 per cent for the month was 0.7 percentage point below what obtained in the similar period of 2004, and 0.3 percentage point lower than the previous month's rate.

Other Measures of Underlying Inflation

8.0 The measure of underlying inflation that excludes agricultural prices (CPI-A) was 0.8 per cent in February, compared to 0.4 per cent in the previous month. Between October 2004 and January 2005, the changes in the CPI-A index were trending downward. The upward movement in the index in February principally reflected increases in administered prices, largely due to adjustments in the minimum wage and hospital charges. Additionally, the increase in the CPI-A index reflected higher fuel price charges, where the price of international crude oil has been the highest in history.
