### September 2014

For September 2014, net remittances were **US\$159.5 million**, an increase of **US\$14.7 million** or **10.1 per cent** relative to the corresponding period of 2013 (Table 1). The growth in net remittance inflows reflected an increase in gross remittance, which was partially offset by an expansion in remittance outflows.

Gross remittance inflows for the month were **US\$182.0 million**, an increase of **US\$18.7 million** or **11.4 per cent** relative to the corresponding month of the previous year. These inflows were above the average of **US\$160.8 million** for the previous five corresponding periods (Graph 1). The out-turn for total remittance inflows reflected increases of **US\$15.0 million** and **US\$3.7 million** in flows through **Remittance Companies** and **Other Remittances**, respectively (Table 1).

### **January to September 2014**

Net remittances for 2014 to-date were **US\$1 431.2 million**, which represented a growth of **US\$82.4 million** or **6.1 per cent** relative to the corresponding period of 2013 (Table 2). The out-turn for the review period reflected an increase in gross inflows, supported by a reduction in outflows.

For the review period total remittance inflows were **US\$1 604.3 million**, representing an increase of **US\$72.4 million** or **4.7 per cent**. These inflows were above the average of **US\$1 455.0 million** for the previous five corresponding periods (Graph 2). Notably, remittance inflows for the year-to-date were above the corresponding pre-crisis out-turn for 2008.

The increase in total remittance inflows reflected an increase of **US\$74.4 million** in inflows through **Remittance Companies**. The increase in these flows was partly offset by a decline of **US\$2.0 million** in inflows from **Other Remittances**.

### April to September 2014/15

For the 2014/15 fiscal year to September, net remittances were **US\$969.7 million**, an increase of **US\$52.2 million** or **5.7 per cent** relative to the corresponding period of the last fiscal year. This growth reflected an increase in gross remittance inflows which were supported by a marginal contraction in outflows.

Total remittance inflows for the review period were **US\$1 089.5 million**, an increase of **US\$50.1 million** or **4.8 per cent** compared to the corresponding period of the preceding fiscal year. These inflows were above the average of **US\$986.7 million** for the previous five corresponding periods (Graph 3).

The increase in total remittance inflows reflected a **US\$52.4 million** or **5.9 per cent** improvement in inflows through **Remittances Companies**, which was partially offset by a **US\$2.3 million** or **1.5 per cent** reduction in flows via **Other Remittances** sub-category.

### July to September 2014

For the third quarter of 2014, net remittances were **US\$473.5 million**, an increase of **US\$23.6 million** or **5.2 per cent** relative to the corresponding quarter of the previous year (Table 3). The out-turn for the review period reflected an increase in gross inflows which was offset by an increase in remittance outflows.

Total remittance inflows for the September 2014 quarter were **US\$540.4 million**, representing an increase of **US\$28.7 million** or **5.6 per cent** relative to the corresponding quarter of the previous year. The inflows for the review quarter were above the average for the previous five corresponding periods (Graph 3).

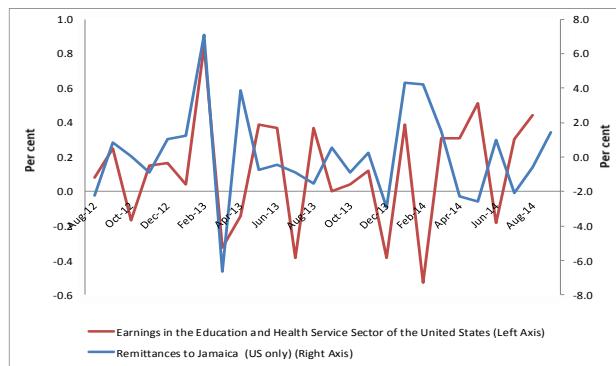

The increase in total remittance inflows reflected an increase of **US\$27.8 million** and **US\$9.6 million** via the **Remittance Companies** and **Other Remittances** sub-categories. A continued improvement in remittance inflows in ensuing quarters is premised on the prospects of improving macroeconomic conditions in the source economies.

**Remittance Inflows and Selected Economic Activity in United States (US).**

The remittance inflows to Jamaica show some congruence with trends in earnings in keys sectors in which Jamaican workers are employed in the US.<sup>1</sup>

The general trend in the growth of earnings in the Leisure and Hospitality sector typically foreshadowed the pattern of growth in gross remittance inflows from US to Jamaica prior to 2013. However, for the third quarter of 2014, the downward trend in average weekly earnings in the Leisure and Hospitality sector shows a reversal of the strong co-movements with gross remittance inflows from US observed in previous quarters (Graph 4). This may be attributable to an increase in employment of the Jamaican diaspora in other sectors of the US economy.

However, for the Education and Health sector the congruence between the changes in earnings and remittance inflows continued for the September quarter (Graph 5). The continued improvement in employment conditions in the US augurs well for continued improvements in remittance inflows to Jamaica for ensuing quarters.
