Thereafter, interest will be paid quarterly on 27 February and 28 May, 28 August and 27 November at a variable rate of 1.25 percentage points above the GOJ 90-day WATBY, applicable at the beginning of each quarterly interest period. APPENDIX II

08/11/18 In an effort to remove liquidity overhang arising from the maturity of both BOJ and GOJ securities, and preserve order in financial markets, the Bank of Jamaica implemented the following measures:

- The Bank offered a Special Certificate of Deposit to Primary Dealers and Commercial Banks, which matured on 3 December 2008. Interest payable on this instrument was 20.50% per annum. This instrument was offered from Tuesday, 18 November to Wednesday, 19 November 2008.

BOJ's regular menu of CDs ranging from 30 days to 365 days remain

- Effective 3 December 2008, on the expiration of a 15 day notice period, the cash reserve requirement of commercial banks, merchant banks and building societies was increased by 2 percentage points to 11 per cent of Jamaica Dollar liabilities. As a consequence, the liquid asset requirement rose to 25 per cent from 23 per cent. The Bank planned to increase these requirements by a further 3 percentage points if market conditions warranted it.

These monetary policy actions are intended to support the achievement of the inflation objective and the maintenance of macro-economic stability.

08/12/01 Interest rates payable on Bank of Jamaica Certificates of Deposit were adjusted as follows:

Tenor	30-day	60-day	90-day	120-day	180-day	365-day
New rates	17.00	17.50	20.00	20.20	21.50	24.00
Previous rates	14.65	14.85	15.05	15.15	15.35	16.70

The increase in interest rates occurred in the context of instability in the foreign exchange market, which was related to the sharp rise in the yields on Government of Jamaica (GOJ) Global Bonds and USD Bonds issued by Jamaican companies. The resulting spike in demand for foreign exchange by securities dealers to meet margin calls from overseas creditors, together with incremental demand for foreign exchange by a wider cross-section of persons triggered a disorderly depreciation in the exchange rate. If this condition persisted, it would precipitate higher inflation and greater macroeconomic instability.

In context of the foregoing, the Jamaica Dollar liquidity resulting from the maturity of significant sums in BOJ securities over the following three weeks made it necessary for BOJ to take this action. Accordingly, the rise in interest rates was expected to dampen the extraordinary demand related to portfolio decisions and thereby restore predictability and order to local financial markets.

09/04/08 Interest rates applicable to Bank of Jamaica 30-day, 60-day, 90-day, 120-day and 180-day Open Market Instruments remained unchanged. Interest rate applicable to Bank of Jamaica 365-day Open Market Instruments was however reduced to 22.67 per cent.

APPENDIX II

- 09/07/30 Interest rates applicable to Bank of Jamaica's 30-day, 60-day, 90-day, 120-day and 180-day Open Market Instruments were reduced to 14.50 per cent, 15.00 per cent, 17.50 per cent, 17.70 per cent, and 19.00 per cent, respectively. The rates on 365-day instruments remained unchanged.
- 09/08/20 Interest rates applicable to Bank of Jamaica's 30-day, 60-day, 90-day, 120-day and 180-day Open Market Instruments were reduced to 13.50 per cent, 14.00 per cent, 16.50 per cent, 16.70 per cent and 18.00 per cent, respectively. The rates on 365-day instruments remained unchanged.
- 09/09/17 Interest rates applicable to Bank of Jamaica's 30-day, 60-day, 90-day, 120-day and 180-day Open Market Instruments were reduced to 12.50 percent, 13.00 per cent, 15.50 per cent, 15.70 per cent and 17.00 per cent, respectively. The rates on 365-day instruments remained unchanged.

BALANCE OF PAYMENTS METHODOLOGY

The presentation format of Jamaica's Balance of Payments (BOP) has been revised to conform with the international standard as embodied in the 5th edition of the BOP manual published by the International Monetary Fund (IMF). The revisions have been made largely to harmonize the Balance of Payments statistics with the internationally accepted System of National Accounts (SNA) and the IMF's international statistical system.

Major Categories of the Balance of Payments

The new presentation of the Balance of Payments still consists of two main accounts. These are the Current Account and the Capital and Financial Account.

A. CURRENT ACCOUNT

The current account is further sub-divided into the Goods and Services, Income and Current transfers sub-accounts.

1. **The Goods and Service Sub-account** covers merchandise trade, travel, transportation and other services.
 - a. **Merchandise Trade:** This encompasses general merchandise, free zone imports and exports and goods procured in ports by international carriers.
 - b. **Travel:** Travel covers the goods and services acquired for personal consumption from an economy by persons staying for less than one year in the economy of which he/she is not a resident. This item includes travel for leisure, business, medical and educational purposes. Expenditure by seasonal workers are also included.
 - c. **Transportation:** This covers those services that involve the carriage of passengers, movement of goods (freight), charter of carriers with crew and other supporting services.
 - d. **Other Services:** Included in this group are services relating to communication, construction, insurance, finance, computer and information, personal, cultural and recreational activities, government and royalties and licenses fees.
2. **The Income sub-account** encompasses the compensation of employees and investment income such as profits, reinvested earnings, interest, dividends and other income.
3. **The Current Transfers sub-account** covers transactions such as taxes on income, workers' remittances, premiums and claims on non-life insurance.

B. THE CAPITAL AND FINANCIAL ACCOUNT has two major components, the Capital Account and the Financial Account.

- 1. The Capital Account** covers (a) capital transfers and (b) the acquisition/disposal of non-produced, non-financial assets.
 - a. Capital transfers** include the transfer (as gift, grant or bequest) of ownership of fixed assets, and funds linked to disposal/acquisition of fixed assets and the cancellation of debt by creditor.
 - b. Acquisition/disposal of non-produced, non-financial assets** involves intangibles such as patents, leases and the purchases/sales of land by foreign embassies.
- 2. The Financial Account** covers (a) direct investment (b) portfolio investment (c) other investments (trade credits, loans, currencies and deposits) and (d) official reserves.

While the composition of the accounts may have changed in some instances, the new presentation still facilitates identification of performance of familiar categories including merchandise trade, services, the current account, public and private capital flows and changes in official reserves.

Tables 28.0-28.1 - Stock Exchange Index and Activities

Compiled from monthly trading data submitted by the Jamaica Stock Exchange.

As of June 1, 2000, the Jamaica Stock Exchange began the dissemination of its three-market capitalization indices: the JSE Index, the JSE All Jamaican Composite and the JSE Select.

The JSE Index (base June 30, 1969 = 100) is an index of all the equities traded on the Stock Exchange. The index is weighted by the market capitalization of each equity.

The JSE Composite Index (base May 1, 2000 = 31931) is an index of All Equities of Jamaican Companies traded on the Stock Exchange.

The JSE Select (base June 1, 2000 = 1000) is an index of the fifteen (15) most liquid stocks trading on the exchange based on times traded and trade volume. The composition of this index is revised on an annual basis.

Calculation of Jamaica Stock Exchange (JSE) Market Index

The JSE uses the following formulae to compute its market indices:

- $\text{Current Index} = \text{Sum} (\text{Issued Volume} \times \text{Current Last Sale Price}) \div \text{Index Base}$
- $\text{Index Change} = \text{Sum} [(\text{Issued Volume} \div \text{Last Sale (Current - Previous)})] \div \text{Index Base}$
Alternatively,
- $\text{Index Change} = \text{Current Market Index} - \text{Previous Market Index}.$

The Index Base is adjusted whenever:

- The issued volume of a listed company changes as a result of the distribution of additional shares from Rights Issues and/or New Issues;
- The market capitalization increases as a result of the listing of a new company;
- The market capitalization declines, as a consequence of the de-listing of a (listed) company.

N.B. Observe that bonus issues and stock splits do not impact market capitalization since both the issued volume and the quoted market price of the particular security would have been adjusted to reflect the split or bonus. As a result, the Base Divisor remains unchanged.

Table 29 - International Reserves

The format reflects:

- (a) Column 5 - Bank of Jamaica's net international reserves position excluding the Bank's medium term liabilities which are usually treated 'above the line' or in the capital account of the balance of payments.
- (b) Column 9 - The country's net official foreign position which includes the Bank of Jamaica's net international reserve position (column 5) as well as those of the Central Government and Selected Public Agencies. The changes in these stock figures normally provide an indication of the country's overall balance of payments surpluses or deficit position for a given period of time.
- (c) Column 12 - The medium term liabilities of the net foreign position of the commercial banks are added to Column 9 to provide a broader concept of the country's foreign position.

Data on the Government sector are obtained from the Accountant General and Government's fiscal agents. Sources for the banking sector are returns of assets and liabilities of the Bank of Jamaica and the commercial banks. Official institutions are: Export Development Fund, Banana Industry Insurance Fund, Banana Board, Coconut Industry Board and the Sugar Industry Authority. The Capital Development Fund (CDF) is a statutory fund established to receive and administer the Funds accruing from the Bauxite Production Levy. Statutory Sinking Fund investments represent sums set aside and invested in foreign securities for the redemption of foreign debt. Domestic holdings of Jamaica Government securities issued in overseas markets have been excluded.

Tables 32.0-32.1 - Value of Exports and Imports by Sections of the S.I.T.C.

The format of Table 32.1 has been revised to reflect the standards recorded in the fifth edition of the Balance

of Payments Manual. Merchandise trade encompasses general merchandise, goods for processing, repairs on goods, goods procured in ports by carriers and imports and exports of the free zones. The Statistical Institute of Jamaica (STATIN) provides data on the first three components in an aggregated form, which are based on custom's records. The data from STATIN are categorized as general merchandise. It should be noted that general merchandise transactions of the free zones are not reported by STATIN, and are therefore carried as a line item in the trade tables. Data on the other components are obtained by way of enterprise surveys.

S.I.T.C. denotes Standard International Trade Classification

Imports are valued at c.i.f. (cost, insurance, freight) in Jamaica dollars.

Exports consist of exports of domestic products and re-exports of imported goods which have previously been cleared by the customs, as well as free zone exports and goods procured in ports.

Exports are valued at f.o.b. prices (free on board) in Jamaica dollars.

The Direct External Debt table is compiled from BOJ records. The debt refers to medium and long term debt of the Government of Jamaica and excludes Government Guaranteed Debt. In May 1986, a reclassification of loans resulted in major changes in some categories.

Table 42.1 - Government Guaranteed External Debt

Government Guaranteed External Debt represents non-central government debt with central government as guarantor, and is consequently a potential liability to central government. In the event of default, government

has to assume responsibility of repayment. The information is compiled from regular returns which are supplied by institutions contracting these loans. A reclassification of loans in May 1986, resulted in major changes in some categories.

Tables 42.2-42.3 - Medium and Long-Term Public and Publicly Guaranteed External Debt

The figures shown represent the National External Debt and is comprised of Direct External Debt, Government Guaranteed External Debt, and Bank of Jamaica's medium and long-term foreign liabilities.

Tables 43.0-43.5 - Consumer Price Indices (Jan. 1988 = 100)

The Consumer Price Index (CPI) is compiled and published each month by the Statistical Institute of Jamaica (STATIN). It is based on a basket of goods and services containing 480 items. The current series which has a base period of December 2006 reflect data captured in a Household Expenditure Survey conducted from June 2004 to March 2005. The survey covered lower and middle income households with median expenditure of \$309,000 in 2004/5, representing 85 per cent of all households.

The geographic regions covered by the new CPI series are:

- **Greater Kingston Metropolitan Area (GKMA):** Kingston, Urban St. Andrew, Portmore, Spanish Town and Bull Bay;
- **Other Urban Centres:** the parish capitals and 32 other urban centres (main towns) outside of GKMA; and
- **Rural Areas:** all the remaining areas not identified as being part of GKMA and Other Urban Centres.

All commodities in the household expenditure survey are divided into twelve (12) major *Expenditure Divisions* that are based on the **Classification of Individual Consumption According to Purpose (COICOP)** - a system developed by the United Nations. The 12 broad *Expenditure Divisions* are:

- Food and Non-Alcoholic Beverages;
- Alcoholic Beverages and Tobacco;
- Clothing and Footwear;
- Housing, Water, Electricity, Gas and Other Fuels;
- Furnishings, Household Equipment and Routine Household Maintenance;
- Health;
- Transport;
- Communication;
- Recreation and Culture;
- Education;

- Restaurants and Hotels; and
- Miscellaneous Goods and Services.

The Divisions comprise Groups of related items. These Groups are further broken down into Classes.

The CPI for each month is computed using a weighted Laspeyres Index methodology.

The Bauxite Companies, the Collector General's Department, the Sugar Manufacturers' Association, the Banana Board, the Jamaica Public Service Company Limited and firms engaged in manufacturing. Tables 46.0 - 46.4 - Gross Domestic Product

Jamaica's Gross Domestic Product data are compiled and published by the Statistical Institute of Jamaica (STATIN) as part of Jamaica's System of National Accounts (JSNA). These revised sets of accounts are now consistent with the United Nations System of National Accounts 1993 (1993 SNA). The JSNA was previously based on the 1968 SNA.

The revised Accounts reflect:

- The compilation of the national accounts in accordance with the 1993 SNA;
- Incorporation of new and revised data into the estimates;
- Revision of the classification of industries in the national accounts; and
- The rebasing of constant price estimates from 1996 to 2003
