The prevailing cap on such investments (with the exception of those categories exempted by Ministerial Order) was 5 per cent. The cap will be lifted in steps to at least 25% by end 2015 with the intention to remove the cap by the end of 2016, unless extraordinary circumstances require a reassessment. Financial entities would be subjected to the prudential standards applicable to each sector of the industry in order to preserve financial stability.
- 2014/1/03 For the period 24 to 31 December 2013, the Bank of Jamaica recorded net currency redemption of \$57.4 million or 0.08 per cent from the commercial banks, building societies and cambios. This net redemption resulted in the stock of currency as at 31 December 2013 being \$69.8 billion which implied a net increase of \$11.5 billion or 19.6 per cent in currency issue for the month. The increase for the month was largely in line with the Bank's projection for growth of 19.0 per cent (see Chart 1). Given the outturn for the month, annual growth in currency issue was 7.9 per cent for 2013 compared to an increase of 3.3 per cent for 2012.
- The Bank anticipated that the majority of the currency issued during December 2013 would be redeemed during January 2014. Over the last five years, net currency redemption in January averaged 79.2 per cent of net currency issued in the preceding December.

BALANCE OF PAYMENTS METHODOLOGY

Introduction to the Balance of Payments Manual 6th Edition

Background to BPM6

Since the first edition of the Balance of Payments Manual (BPM) was published in 1948, developments in global transactions have created the need for amendments to the publication, which adequately capture international economic transactions. Currently, the manual utilized by most economies is the Fifth Edition (BPM5), which was published in 1993. However, the Sixth Edition (BPM6) of the manual was released in 2009 and is titled the *Balance of Payments and International Investment Position Manual*.

Transition to BPM6

Recent releases of the Bank of Jamaica (BOJ) Quarterly Balance of Payments (BOP) Report included a BPM6 introductory feature which has been included as a parallel transition towards the complete reformatting of this publication in accordance with BPM6 reporting standards. From now on, all BOP reports will be published using the BPM6 methodology exclusively. As illustrated, this new methodology includes more detailed *Financial Account* data which is aimed at enhancing the understanding of how net lending is invested and how net borrowing is financed, among other changes.

Understanding BPM6

One major change in the sixth edition of the Balance of Payments (BOP) manual is that the *Capital Account* will no longer be grouped with the *Financial Account*, but with the *Current Account* instead. The overall balance from the *Current* and the *Capital account* is now referred to as *Net Lending or Borrowing*. Also, the use of debits and credits for the *Financial Account* is replaced by *Net Acquisition of Financial Assets* and the *Net Incurrence of Liabilities*.

BPM6 also introduces the categories of *Primary* and *Secondary Income*, which are conceptually consistent with the System of National Accounts (SNA). *Primary Income* encompasses returns that accrue to institutional units for their contribution to the production process or for the provision of financial assets and renting of natural resources, while *Secondary Income* represents *Current Transfers* between residents and non-residents. Please see mapping of BPM5 terminologies with the new terminologies found in BPM6 on next page.

Glossary (BPM5)

Balance of Payments

The balance of payments (BOP) is a summary of economic activities between the residents of a country and the rest of the world during a given period, usually one year. The main purpose of keeping these records is to inform government authorities of the overall international economic position of the country in order to assist them in arriving at decisions on monetary and fiscal policy, on the one hand, and trade and payments policy on the other. BOP statistics are therefore helpful to government authorities charged with maintaining macroeconomic stability.

The BOP is divided into two main categories according to the broad nature of the transactions. These categories are:

1. *The Current Account, and*
2. *The Capital and Financial Account*

1. Current Account

The current account includes all transactions (excluding those recorded in the capital and financial account) between resident and non-resident entities that involve economic value. This account is sub-divided into:

- a. *Goods and Services*
- b. *Income, and*
- c. *Current Transfers*

a. The **Goods** and **Services** account covers merchandise trade, travel, transportation and other services.

i. **Merchandise trade** records the value of exports and imports, of tangible goods, including those of the free-zones and goods procured in ports by international carriers.

ii. **Travel** covers goods and services acquired from an economy by non-resident travellers for business and personal purposes during their visits (of less than one year). Expenditures made by seasonal workers (e.g. Jamaican farm workers) and those for educational and health-related purposes made by students and medical patients are recorded in this sub-account.

iii. **Transportation** covers all transportation services (sea, air and land), bought and sold, that involve the carriage of passengers, movement of goods (freight), charter of carriers with crew and other supporting services.

iv. **Other Services** consist of the purchase and sale of: communication services, construction services, insurance services, financial services, computer and information services, royalties and licences fees and government services.

b. **Income** encompasses the compensation of employees, that is, salaries, wages and benefits of seasonal and other non-resident workers. In addition, it includes investment income that consists of dividends, profits, reinvested earnings, interest on debt and income on portfolio investment.

c. **Current Transfers** cover transactions such as taxes on income, workers' remittances, and premiums and claims on non-life insurance.

2. Capital and Financial Account

The **capital** and **financial** account records transactions that directly affect the wealth and debt of the country. The account is sub-divided into two main categories:

a. *The Capital Account, and*

b. *The Financial Account*

a. The Capital Account covers (i) capital transfers and (ii) the acquisition/disposal of non-produced, non-financial assets.

(i) **Capital Transfers** include the transfer of ownership of fixed assets, the transfer of funds linked to disposal/acquisition of fixed assets and the cancellation of debt by creditors. Acquisition/disposal of non-produced, non-financial assets mainly involves intangibles such as patents and leases. It also includes purchases and sales of land by foreign embassies.

b. The Financial account covers (i) direct investment, (ii) portfolio investment, (iii) other investments (trade credits, loans, currencies and deposits) and (iv) changes in reserves.

(i) **Direct Investment** is the category of international investment in which a resident entity in one economy acquires or disposes of 10 per cent or more of the ordinary shares or voting power of an enterprise located in another economy and has an effective voice in management.

(ii) **Portfolio Investment** covers transactions in equity securities and debt securities. With respect to equity, a portfolio investment would imply less than 10 per cent ownership of the voting power of an enterprise located in another country. Debt securities include bonds and notes, money market instruments and financial derivatives.

(iii) ***Other Investment*** is a residual category that includes all financial transactions not covered in direct investment, portfolio investment or reserve assets. It includes trade credits, (the direct extension of credit by suppliers to buyers of goods and services), loans to finance trade, other loans and advances and financial leases.

(iv) ***Reserves*** represent the foreign exchange which the country has available for financing an imbalance of payments with the rest of the world.

Tables 33b-33c - Stock Exchange Index and Activities

Compiled from monthly trading data submitted by the Jamaica Stock Exchange.

As of June 1, 2000, the Jamaica Stock Exchange began the dissemination of its three-market capitalization indices: the JSE Index, the JSE All Jamaican Composite and the JSE Select.

The JSE Index (base June 30, 1969 = 100) is an index of all the equities traded on the Stock Exchange. The index is weighted by the market capitalization of each equity.

The JSE Composite Index (base May 1, 2000 = 31931) is an index of All Equities of Jamaican Companies traded on the Stock Exchange.

The JSE Select (base June 1, 2000 = 1000) is an index of the fifteen (15) most liquid stocks trading on the exchange based on times traded and trade volume. The composition of this index is revised on an annual basis.

Calculation of Jamaica Stock Exchange (JSE) Market Index

The JSE uses the following formulae to compute its market indices:

- $\text{Current Index} = \frac{\text{Sum (Issued Volume X Current Last Sale Price)}}{\text{Index Base}}$
- $\text{Index Change} = \frac{\text{Sum [(Issued Volume} \div \text{Last Sale (Current - Previous))]}{\text{Index Base}}$
Alternatively,

- $\text{Index Change} = \text{Current Market Index} - \text{Previous Market Index}.$

The Index Base is adjusted whenever:

- The issued volume of a listed company changes as a result of the distribution of additional shares from Rights Issues and/or New Issues;
- The market capitalization increases as a result of the listing of a new company;
- The market capitalization declines, as a consequence of the de-listing of a (listed) company.

N.B. Observe that bonus issues and stock splits do not impact market capitalization since both the issued volume and the quoted market price of the particular security would have been adjusted to reflect the split or bonus. As a result, the Base Divisor remains unchanged.

EXTERNAL SECTOR

Table 34 - International Reserves

The format reflects:

- (a) Row 4 - Bank of Jamaica's net international reserves position excluding the Bank's medium term liabilities which are usually treated 'above the line' or in the capital account of the balance of payments.
- (b) Row 8 - The country's net official foreign position which includes the Bank of Jamaica's net international reserve position (row 4) as well as those of the Central Government and Selected Public Agencies. The changes in these stock figures normally provide an indication of the country's overall balance of payments surpluses or deficit position for a given period of time.
- (c) Row 11 - The BOJ medium term liabilities and commercial banks net Foreign Assets are added to Row 8 to provide a broader concept of the country's foreign position.

Data on the Government sector are obtained from the Accountant General and Government's fiscal agents. Sources for the banking sector data returns, which record the assets and liabilities of the Bank of Jamaica and the commercial banks. Official institutions are: Export Development Fund, Banana Industry Insurance Fund, Banana Board, Coconut Industry Board and the Sugar Industry Authority. Tables 36a-36b - Value of Exports and Imports by Sections of the S.I.T.C.

The format of Tables 36a and 36b reflect the standards recorded in the sixth edition of the Balance of Payments Manual. Merchandise trade encompasses general merchandise, goods for processing, repairs on goods, goods procured in ports by carriers and imports and exports of the free zones. The Statistical Institute of Jamaica (STATIN) provides data on the first three components in an aggregated form, which are based on the Jamaica Customs Department records. The data from STATIN are categorized as general merchandise. It should be noted that general merchandise transactions of the free zones are not reported by STATIN, and are therefore carried as a line item in the trade tables. Data on the other components are obtained by way of enterprise surveys.

S.I.T.C. denotes Standard International Trade Classification

Imports are valued at c.i.f. (cost, insurance, freight) in Jamaica dollars.

Exports consist of exports of domestic products and re-exports of imported goods which have previously been cleared by the Jamaica Customs Department, as well as free zone exports and goods procured in ports.

Exports are valued at f.o.b. prices (free on board) in Jamaica dollars.

Tables 37a-37b – Foreign Direct Investment

Table 44b – Gross External Debt

The IMF's Gross External Debt Guide 2013 defines gross external debt as follows:

Gross external debt, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and that are owed to nonresidents by residents of an economy.

Data in this table are sourced from the Ministry of Finance (MOF) and BOJ's survey of selected financial and non-financial institutions.

Table 45 – Private Sector Transfers

According to the fifth edition of the Balance of Payments Manual remittances to an economy are defined primarily by 'Workers Remittances'. Workers Remittances cover current transfers by migrants who are employed in new economies and considered residents there. The revised BOP manual proposes an expansion in the items considered remittances. Firstly, the concept 'workers remittance' is replaced with personal transfers. Secondly, the concepts of 'personal remittances', 'total remittances', and 'transfers to nonprofit institutions serving households' are introduced. Within the balance of payments framework, investments in the economy by migrants, such as bank deposits and portfolio investments are excluded from remittances.

PUBLIC FINANCE & DEBT

Table 47 National Debt - Internal

The National Internal Debt table is compiled from the records of B.O.J. and Ministry of Finance. Total Bonds include Land Bonds, Debentures, US\$ Indexed Bonds and US\$ Denominated Bonds.

Table 48a - Government Direct Externally Issued Debt

Data on Direct Externally Issued Debt data are compiled from records of the Ministry of the Finance and represent medium and long term loans & securities of the Government of Jamaica regardless of the residency of the holder of the debt. It excludes Government Guaranteed Debt issued outside of Jamaica on the primary market.

Table 48b - Government Guaranteed Externally Issued Debt

Government Guaranteed Externally Issued Debt represents non-central government loans & securities issued outside of Jamaica on the primary market, regardless of the residency of the holder of the debt, with the Government of Jamaica as guarantor. This category of debt is a potential liability to central government: in the event of default, the government has to assume responsibility of repayment. The information on the outstanding balances is compiled from regular returns which are supplied by the guaranteed institutions contracting these loans.

Tables 48c-48d - Medium and Long-Term Public and Publicly Guaranteed Externally Issued Debt

The figures shown represent the National Externally Issued Debt of the Government of Jamaica (GOJ) based on the initial issue of the debt and are comprised of Government Direct Externally Issued Debt, Government Guaranteed Externally Issued Debt and Bank of Jamaica's medium and long-term foreign debt.

Medium and long-term public external debt have original or extended maturity of more than one year and repayable in foreign currency.

PRICES & PRODUCTION

Tables 50a – Jamaica’s Inflation Rates

Inflation Rates are calculated and published each month by the Statistical Institute of Jamaica (STATIN). Inflation is measured through the use of the Consumer Price Index, which captures the rate of price change for goods and services consumed in Jamaica

Tables 50b – Comparative Inflation Rates

This table shows the annual point-to-point inflation rates of Jamaica and each of its major trading partners.

51 - 52d - Consumer Price Indices (Jan. 1988 = 100)

The Consumer Price Index (CPI) is compiled and published each month by the Statistical Institute of Jamaica (STATIN). It is based on a basket of goods and services containing 480 items. The current series which has a base period of December 2006 reflect data captured in a Household Expenditure Survey conducted from June 2004 to March 2005. The survey covered lower and middle income households with median expenditure of \$309,000 in 2004/5, representing 85 per cent of all households.

The geographic regions covered by the CPI series are:

- **Greater Kingston Metropolitan Area (GKMA):** Kingston, Urban St. Andrew, Portmore, Spanish Town and Bull Bay;
- **Other Urban Centres:** the parish capitals and 32 other urban centres (main towns) outside of GKMA; and
- **Rural Areas:** all the remaining areas not identified as being part of GKMA and Other Urban Centres.

All commodities in the household expenditure survey are divided into twelve (12) major *Expenditure Divisions* that are based on the **Classification of Individual Consumption According to Purpose (COICOP)** - a system developed by the United Nations. The 12 broad *Expenditure Divisions* are:

- Food and Non-Alcoholic Beverages;
- Alcoholic Beverages and Tobacco;
- Clothing and Footwear;
- Housing, Water, Electricity, Gas and Other Fuels;
- Furnishings, Household Equipment and Routine Household Maintenance;
- Health;
- Transport;
- Communication;
- Recreation and Culture;
- Education;
- Restaurants and Hotels; and
- Miscellaneous Goods and Services.

The Divisions comprise Groups of related items. These Groups are further broken down into Classes.

The CPI for each month is computed using a weighted Laspeyres Index methodology.

Table 53 - Production of Selected Commodities

Compiled from monthly reports submitted by the Jamaica Bauxite Institute, the Bauxite Companies, the Collector General's Department, the Sugar Manufacturers' Association, Banana Board, the Jamaica Public Service Company Limited and firms engaged in manufacturing. Bauxite includes bauxite converted into alumina in Jamaica. The figures for bananas refer to exports only. Figures for the other commodities are based on information provided directly by the firms involved.

Tables 54a – 54e - Gross Domestic Product (GDP)

Gross Domestic Product is the total value of final goods and services produced within a country's borders in a year. The change in gross domestic product (GDP) from one period to another results from the contribution of two changes, one being the change in the volume of goods and services produced, and the other in the price at which they are sold.

GDP at current prices reflects both these changes, as production for the period is measured at the prices of that period. GDP at constant prices on the other hand reflects only the changes in the volume of production. This indicator measures production of the period at the prices of another period (referred to as the base year).

As part of the system of national accounts, The Statistical Institute of Jamaica carried out revisions in order to incorporate the most current information from regular surveys, censuses, financial records and administrative data. Revisions were undertaken on the annual national accounts, which covered the period from 2001 to 2010, and included the compilation of a supply and use table for 2007, rebasing of the constant price estimates from 2003 to 2007 and revised estimates for:

1. Accounts of the nation
 - Gross domestic product by expenditure and income
 - Generation and use of disposable income
 - Capital accounts
 - Rest of the world accounts
2. Value added by industry
